National Item File

John Hinson

National Item File

- Introduction
- Development Process
- Attributes
- Field Impact
- Resources

Introduction

- NIF Committee
- Acquisition Planning
- Performance Based Service Contract
- Statement of Objectives
- Task Order
- Contract Team

Performance Based Service Contract

- Work Plan
- Project Management Plan
- Quality Assurance Plan
- Data Acquisition
- Data Cleansing
- Data Normalization
- Baseline NIF

Development Process

- IC Assimilates the Source Data
- Cerner sets up business rules and commodity templates
- SoftFace processes records for initial cleansing
- Cerner provides QA
- AristoMed Develops nomenclature and unidentified attributes
- IC provides baseline NIF

New Items

- United Nations Standard Products and Services Code (UNSPSC)
- North American Industry Classification System (NAICS)
- Universal Product Number (UPN)
- Universal Medical Device Nomenclature System (UMDNS)

UNSPSC

- Hierarchical Structure
- Four pre-defined sections and one business specific section
  - Segment
  - Family
  - Class
  - Commodity
  - Business Function
  - XX-XX-XX-XX-(XX)

NAICS

- Hierarchical Structure
- Four predefined sections
  - Sector
  - Subsector
  - Industry Group
  - Industry
  - U.S. Industry
  - XX-X-X-X-X

UPN

- Identification, not Classification
- Product/Packaging Level Specific
- Two Standards
  - UCC/EAN
    - 14 Digit Fixed Length Numeric
  - HIBCC
    - 8-20 Character Alphanumeric Variable Length

UMDNS

- International Classification System for Indexing and Retrieval
- A unique 5 digit universal medical device code.
- Linked to JCAHO
- Linked to FDA Recalls

Field Impact

- Implementation
  - NIF Number
  - Long and Short Description
  - Save-Off Field
  - Level of Access to Local Files
  - Visibility Between Stations
  - Crossover to coreFLS
